# Dichroic mirror, 50 x 50 mm (HR B, HT R+G)

Optical parts and Scanner sets

---

The available thickness is 1 and 2mm, please define the preferred thickness in your order. Generally the 2mm mirrors have better flatness at larger areas. Our 2mm thick mirrors have flatness  $\lambda/4$  at each 10x10mm area. The glass can be cut easily by a diamond. Different size is available on request, please contact us directly.
