
RGB mirror, 50x50 mm

Optical parts and Scanner sets

This broadband RGB mirror is used to reflect 440-640nm laser beam by 90 degree with efficiency more than 98%. The available thickness is 1 and 2mm, please define the preferred thickness in you order. Generally the 2mm mirrors have better flatness at larger areas. Our 2mm thick mirrors have flatness $\Lambda/4$ at each 10x10mm area. The glass can be cut easily by a diamond. Different size is available on request, please contact us directly.
