
FB3 QuickShow 3.0

Laser Control Systems

Powerful, Affordable, and Easy to Use, **QuickShow** is the complete package including both the hardware and software.

QuickShow comes standard with nearly **2,000 pre-loaded** cues, and it allows you to create custom beam effects, graphics, text, animations, abstracts, and more! The QuickShow software is designed to make creating high quality laser shows faster and easier than ever before.

Hardware: The QuickShow package comes with the **FB3-QS (FlashBack)**

Software: The QuickShow package comes with the latest QuickShow software and all updates are **FREE** to our users. The software is extremely powerful, yet easy to use. Users can create their own effects, or choose from any of the nearly 2,000 preloaded cues. You can also preprogram shows, or play them "live" right at your event.

QuickShow users can also upgrade to use the **BEYOND** software.
